

case study

Moat Housing Essex, London, Kent, Surrey and Sussex

Project: Moat Housing window and door replacement contract, London and the South East

Client: Moat Housing

Windows and doors installed: 6000+
(over 5 years)

System: REHAU TOTAL70

We were appointed to Moat's window and door replacement framework in the autumn of 2017, and are delighting the residents who are having their windows and doors replaced, with KPI scores on the project running at 9.9/10.

We are supporting Moat Housing's social value activities of course, and have donated £10,000 to help set up and furnish a new Moat Foundation Community Hub in Maldon, Essex.

We know that direct working delivers value for money for Moat. Just 20 weeks into our window and door replacement framework for them we completed their 500th installation – and presented chocolates and flowers to the lucky customer.

We are also providing work placements and supporting community events to benefit Moat residents within the wider region covered by the framework, which includes Essex, London, Kent, Surrey and Sussex.
